DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1 – 46 are rejected under 35 U.S.C. 102(e) as being anticipated by Knapp et al. (U.S. Pat. No. 6,235,471 B1). Knapp et al. anticipate a computer implemented methodology for operating an integrated microfluidic system (see entire reference). In particular, Knapp et al. teach the utilization of a computer (1820) for implementing the claimed methodology using a robotic movable armature (1815) connected to a microfluidic substrate (1810) (see col. 57, lines 41 – 67; figure 18). Knapp et al. specifically teach providing a microfluidic device handling system comprising capillary elements for facilitating fluid transfer from an arrayed set of materials (see col. 7, lines 24 – 37; figure 18).

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention “by another,” or by an appropriate showing under 37 CFR 1.131.

Response to Arguments

Applicant's arguments with respect to claims 1 – 46 have been considered, but are moot in view of the new ground(s) of rejection.
